

Viva questions:

1. Steps to create branches in GIT Repository and merge the files of branches to Main branch?
2. Difference between PUSH and PULL commands in GIT?
3. What is the use of CHECKOUT, COMMIT commands in GIT?
4. Differences between HTML and CSS?
5. Explain IF statement with example in JavaScript?

ANSWERS

1. Create branch: git branch branch_name

Switch branch: git checkout branch_name

Merge to main:

git checkout main

git merge branch_name

2. Push: Upload local commits → remote repository

Pull: Download + merge remote changes → local repository

3. Checkout: Switch between branches or files.

Example: git checkout branch_name

Commit: Save changes in local repository

Example: git commit -m "message"

4. HTML VS CSS

HTML

Structure/content

Defines headings, paragraphs, links

CSS

Style/design

Defines colors, fonts, layouts

5. The IF statement checks a condition.

If the condition is true, it runs the code inside { }.

If the condition is false, it skips that code.

EXAMPLE: let marks = 75;

```
if (marks >= 50) {  
    console.log("You passed!");  
}
```

HTML

CSS

.
